PROFESSIONAL SUMMARY

Computer Science student at **FAST-NUCES** (Class of 2027) with hands-on full-stack development experience through an industry internship and personal projects. Experienced with **React, Next.js, Node.js, REST APIs,** and **PostgreSQL,** with a focus on building practical applications, debugging issues, and developing maintainable software.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, SQL, C/C++
Frontend	React, Next.js, React Native, HTML, CSS
Backend	Node.js, Express, .NET, REST APIs, JWT Authentication, FastAPI
Databases	PostgreSQL
Tools	Git/GitHub, Docker, Vercel
AI/ML	Python, PyTorch, scikit-learn, YOLOv8, Reinforcement Learning (PPO)

EXPERIENCE

Full-Stack Developer Intern | A-Nets Cyber Solution — Jun 2026 – Aug 2026

- Developed responsive front-end interfaces and back-end functionality, integrating them with RESTful APIs and a database.
- Debugged and tested assigned features and wrote technical documentation to keep delivered code maintainable.
- Collaborated with the team to deliver assigned features and solutions.

Lab Demonstrator, Programming Fundamentals | FAST-NUCES, Karachi — Aug 2025 – Dec 2025

- Taught lab sessions to 50+ students, explaining core programming concepts and guiding hands-on problem solving.
- Mentored students through debugging sessions and assisted with grading and written feedback.

PROJECTS

TicketFlow: Campus Maintenance & Issue Tracking System

Next.js · TypeScript · Node.js/Express · PostgreSQL · JWT · REST APIs

- Built a full-stack ticketing system for reporting and resolving campus issues, with JWT authentication and role-based access for Reporters, Technicians, and Admins.
- Implemented REST APIs with an enforced ticket status workflow, assignment, comments, and a status-change audit history, backed by a relational PostgreSQL schema.

FAST Sports Complex Management System (FSCM)

React · Node.js · PostgreSQL · REST APIs

- Built a full-stack platform to manage sports facilities, events, and equipment, with CRUD operations and role-based dashboards.
- Designed REST APIs and a responsive React frontend backed by a PostgreSQL database.

Scholr: Student Book Sharing App

React Native · Node.js · Docker

- Developed a cross-platform mobile app for listing, browsing, and requesting books within a campus network.
- Implemented real-time messaging between users and containerized the backend services with Docker.

FAST Past Papers: Web Application

React · Vercel

- Built a React web app giving students centralized access to academic past papers, deployed on Vercel.

AI-Powered Adaptive Traffic Control System

Python · YOLOv8 · PyTorch · Stable-Baselines3 (PPO) · SUMO · FastAPI · React · WebSockets

- Built a system that estimates vehicle density with YOLOv8 and adjusts signal timing using a PPO agent trained in SUMO.
- Developed a FastAPI + React dashboard streaming live traffic metrics over WebSockets, with emergency-vehicle signal preemption.

EDUCATION

BS Computer Science | FAST-NUCES, Karachi • GPA: 3.06 — 2023 – 2027

HSSC Pre-Engineering | IBA Community College, Khairpur — 2021 – 2023

CERTIFICATIONS

IBM Data Analyst Professional Certificate (IBM / Coursera) • Advanced Machine Learning, Big Data, and Deep Learning (Packt)
